# STORE CHECKLIST FOR CIPC

**Before using CIPC, every store must be assessed against the criteria listed to comply with Red Tractor Assurance and Best Practice. Address any red categories before treatment. If two reds or more remain, DO NOT TREAT**

<b>Store Owner</b>
<b>Store ID</b>

Key issue		Guidelines	R	A	G
<b>1</b>	STORE LOCATION	Proximity to non-target crops or other goods Sheltered from wind? Proximity to residential property	Adjacent	Distant	+Sheltered
<b>2</b>	STORE INTEGRITY	Leaks: undertake lightproof test Check louvre and door seals Evidence of leaks at eaves?	Multiple	Some	Few/None
<b>3</b>	EMPTY AIR SPACE IN STORE	Is the store full enough? Divide the volume occupied by crop by the total building volume (length x width x average height) x 100%	under 40%	40-60%	over 60%
<b>4</b>	CIPC APPLICATION POINT	Dedicated port(s) installed? Fog not applied directly on to crop or boxes Centrally positioned or positive plenum for box	Poor	Fair	Good
<b>5</b>	UNIFORM STORE ENVIRONMENT	Facility to recirculate before application to eliminate condensation and create even temperature? Fridges can be turned off independently from fans to allow this	None	Fair	Good
<b>6a</b>	BULK STORE SUITABILITY	Clear ductwork, adequate laterals Balanced airflow Inverters for slow speed recirculation of fog	Poor	Good	+Inverters
<b>or</b>					
<b>6b</b>	BOX STORE SUITABILITY	Unimpeded air circulation throughout store Clear pallet slots with even stack height Application via plenum: see 4 above Fridges: see 5 above	Poor	Fair	Good

<b>Assessed by</b>	<b>Date</b>
