

## Medicine Administration Record

Treatment date (start and end date if multiple treatments) <sup>1</sup>	Identify of animal/ group of animals treated	Number of animals treated	Name of medicine used	Medicine batch/ bottle number	Quantity of medicine used	Length of withdrawal period		Date when animal/ milk fit for human consumption <sup>2</sup>		Name of person administering medicine	Reason for treatment
						Milk	Meat	Milk	Meat		

<sup>1</sup>If a course of treatment requires more than one administration over a period this column will record the final treatment and allow all treatments to be recorded in a single line of the record. The end of the withdrawal period will be calculated from the date of the final treatment.

<sup>2</sup>This will be the withdrawal period added to the date treatment was finished
