Poultry Catching & Transport

Key – Those standards which have greater significance (all other standards are normal)

Recommendation – Those which do not affect certification

New – A completely new standard which the member must now adhere to

Revised – A standard that has changed and requires the member to take some different or additional action to before

Upgraded – The standard has been upgraded to a Key standard or from a Recommendation to a full standard

Appendix – this is referenced in the 'How you will be measured' column and indicates that additional information is provided in the Appendices.

 This icon indicates that a record is required.

 **Where to find help** – at the end of each section we have indicated where you can get extra guidance if you need it.

CC.DP.a

Standards

Catchers must have a copy of the Red Tractor Assurance for Farms – Catching and Transport Standards available

How you will be measured

- Up-to-date hard or electronic copy of the standards

CC.DP.c

Standards

Systems must be in place for recording, investigating and resolution of any complaints received that are relevant to the requirements of the Catching and Transport Standards

How you will be measured

- Complaints made by Local Authority, general public, customers (e.g. processing plant feedback) or other
- System includes recording the:
 - complaint
 - investigation result
 - action taken to prevent the issue happening again

- Complaints record

CC.DP.d

Standards

A nominated member of the catching team is responsible for the catching operation and bird welfare during the catching process

How you will be measured

- This person is on-farm during catching

CC.DP.e

Standards

A Standard Operating Procedure is in place for catching which takes into account biosecurity, health and safety, hygiene and bird welfare requirements and a hard copy must be accessible to staff

How you will be measured

- The hard copy must be dated and reviewed bi-annually

CC.DP.f

Standards

There must be a catching schedule

How you will be measured

- The schedule takes bird weight and biosecurity (e.g. final depops vs. partial depops) into consideration and allows sufficient breaks between loads

CC.DP.g

Standards

All catching companies must be registered with the Red Tractor Poultry Scheme

TC.DP.a

Standards

Catchers must have a copy of the Red Tractor Assurance for Farms – Catching and Transport Standards available

How you will be measured

- Up-to-date hard or electronic copy of the standards

TC.DP.c

Standards

Systems must be in place for recording, investigating and resolution of any complaints received that are relevant to the requirements of the Catching and Transport Standards

How you will be measured

- Complaints made by Local Authority, general public, customers (e.g. processing plant feedback) or other
- System includes recording the:
 - complaint
 - investigation result
 - action taken to prevent the issue happening again

- Complaints record

TC.DP.d

Standards

A nominated member of the catching team is responsible for the catching operation and bird welfare during the catching process

How you will be measured

- This person is on-farm during catching

TC.DP.e

Standards

A Standard Operating Procedure is in place for catching which takes into account biosecurity, health and safety, hygiene and bird welfare requirements and a hard copy must be accessible to staff

How you will be measured

- The hard copy must be dated and reviewed bi-annually

TC.DP.f

Standards

There must be a catching schedule

How you will be measured

- The schedule takes bird weight and biosecurity (e.g. final depops vs. partial depops) into consideration and allows sufficient breaks between loads

TC.DP.g

Standards

All catching companies must be registered with the Red Tractor Poultry Scheme

KC.DP.a

Standards

Catchers must have a copy of the Red Tractor Assurance for Farms – Catching and Transport Standards available

How you will be measured

- Up-to-date hard or electronic copy of the standards

KC.DP.c

Standards

Systems must be in place for recording, investigating and resolution of any complaints received that are relevant to the requirements of the Catching and Transport Standards

How you will be measured

- Complaints made by Local Authority, general public, customers (e.g. processing plant feedback) or other
- System includes recording the:
 - complaint
 - investigation result
 - action taken to prevent the issue happening again

- Complaints record

KC.DP.d

Standards

A nominated member of the catching team is responsible for the catching operation and bird welfare during the catching process

How you will be measured

- This person is on-farm during catching

KC.DP.e

Standards

A Standard Operating Procedure is in place for catching which takes into account biosecurity, health and safety, hygiene and bird welfare requirements and a hard copy must be accessible to staff

How you will be measured

- The hard copy must be dated and reviewed bi-annually

KC.DP.f

Standards

There must be a catching schedule

How you will be measured

- The schedule takes bird weight and biosecurity (e.g. final depops vs. partial depops) into consideration and allows sufficient breaks between loads

KC.DP.g

Standards

All catching companies must be registered with the Red Tractor Poultry Scheme

AIM: STAFF AND LABOUR PROVIDERS (CC)

CC.SC.a Key

Standards

Systems must be in place to ensure that all new staff are effectively trained and deemed competent to carry out the activities they are employed to do

How you will be measured

- Nobody starts work without an induction, supervision or explanation of the tasks they will carry out
- For any specific tasks referenced within the Standards (e.g. welfare, responsibility for cleanliness and disinfection of catching equipment) additional training is given prior to being left to complete the task unsupervised

CC.SC.b

Standards

The performance and competence of staff must be regularly reviewed and refresher training implemented as required

How you will be measured

- Staff are observed at least annually and the output of their work reviewed
- Refresher training is implemented immediately if issues are found

CC.SC.c

Standards

Records of training must be kept

How you will be measured

- A training record is available for all, including:
 - name
 - start date (if applicable)
 - training given/ events attended/ experience
 - date of training
 - who provided the training
- Where staff are trained to undertake specific tasks this is listed in the record
- Records kept for two years after staff member has left employment

- Staff training record

CC.SC.d

Standards

All members of the catching team must adopt British Poultry Training - Poultry Passport or poultry training record as the formal route for industry training and training recognition.

How you will be measured

- The mandatory training requirement specified on the Poultry Passport is delivered by providers or in-house tutors that have been approved by British Poultry Training

CC.SC.e

Standards

Where labour providers are used to supply temporary or permanent staff an agreement must be in place to ensure competent persons are provided

How you will be measured

- Agreement in place where labour providers are used regularly or on an ad-hoc basis
- Agreement confirms that labour provided is competent and that a current, valid Gangmasters Licence is held

- Labour provider agreement
-

AIM: TRACEABILITY AND ASSURANCE STATUS (CC)

CC.TLa Key

Standards

Birds must be identified and records kept to maintain traceability throughout the catching and transport operation

How you will be measured

- Farm scheme registration number is included on dispatch notes
-

- Traceability records
-

AIM: TRACEABILITY AND ASSURANCE STATUS (TC)

TC.T1.a Key

Standards

Birds must be identified and records kept to maintain traceability throughout the catching and transport operation

How you will be measured

- Farm scheme registration number is included on dispatch notes
-

- Traceability records
-

AIM: TRACEABILITY AND ASSURANCE STATUS (KC)

KC.TLa Key

Standards

Birds must be identified and records kept to maintain traceability throughout the catching and transport operation

How you will be measured

- Farm scheme registration number is included on dispatch notes
-

- Traceability records
-

AIM: BIOSECURITY AT CATCHING (CC)

CC.BC.a

Standards

Catching teams must sign-in immediately on arrival at the farm

How you will be measured

- The nominated member of the catching team signs in each member of the team on arrival – recording date, time of arrival, name of each member and a reference code of the catching team, company and Red Tractor Assurance number
- Each member of the catching team also certifies that they are not suffering from any enteric illnesses

CC.BC.b

Standards

Catching teams must maintain records of all farms visited within the past 6 months

- Records detailing farm addresses, members of catching team who attended/ reference code of the catching team, vehicles and catching equipment used

CC.BC.c

Standards

Immediately after signing in catching teams must make themselves aware of the defined biosecure areas on the farm

How you will be measured

- Only after this has been done do members of the catching team begin to enter the biosecure area

CC.BC.d Key

Standards

Dedicated clothing and footwear must be worn by all on entry to each bird area at partial depopulation

How you will be measured

- disposable clothing or clothing which is washed between farms is worn
- dedicated boots must be worn and cleansed and disinfected between bird houses using a Defra-approved disinfectant

CC.BC.e Key

Standards

Dedicated clothing and footwear must be worn by all on entry to the biosecure area at full depopulation

How you will be measured

- disposable clothing or clothing which is washed between farms is worn
- boots are able to be cleaned and disinfected (i.e. are rubber) and are thoroughly washed, scrubbed and disinfected using a Defra-approved disinfectant between farms

CC.BC.f Key

Standards

Footdips must be used by all on each entry to the biosecure area

CC.BC.g Key

Standards

Hands must be washed or sanitised on every entry to each house

CC.BC.h Key

Standards

Only essential vehicles must enter the biosecure area e.g. poultry transport lorry, vehicles containing essential equipment, clean company vehicles

How you will be measured

- **personal transport is not considered as an essential vehicle and remains parked outside the biosecure area**
 - **for breaks catchers use the facilities provided by the farm or a clean company vehicle which has been disinfected on entry to the biosecure area**
-

CC.BC.i Key

Standards

Footdips must be used by all on entry and exit to each poultry house

CC.BC.j Key

Standards

Footwear must be visibly clean before using a new footdip when moving to a new house

CC.BC.k

Standards

The loading area provided must be used for loading birds

CC.BC.l

Standards

Catching equipment, including catchers' transport and mechanical harvesting equipment, must arrive on-farm clean and disinfected

How you will be measured

- **Visual inspection made and documented**
-

- Record held of the cleanliness of catching equipment on arrival
-

CC.BC.m

Standards

Catching equipment, including catchers' transport and mechanical harvesting equipment, must be cleaned and disinfected prior to leaving the farm.

How you will be measured

- **Cleaning & disinfection on site must be documented**
- **Catching equipment can be taken to an off-site location to be cleaned and disinfected, but only if it moves directly from the farm to the off-site location. This must also be documented**

- Record held of when and where cleaning & disinfection took place

CC.BC.n

Standards

Smoking, eating and drinking must be carried out only in designated areas

How you will be measured

- **hands are washed or sanitised directly before and after smoking, eating or drinking**

CC.BC.o

Standards

Staff must not keep or have contact with other poultry or any avian species

CC.BC.p

Standards

If there are any concerns about the biosecurity provisions or facilities provided by the farm they must be raised with the nominated person of the catching team who must raise them with the farm manager/ company

- Record of any issues raised with farm manager

AIM: BIOSECURITY AT CATCHING (TC)

TC.BC.a

Standards

Catching teams must sign-in immediately on arrival at the farm

How you will be measured

- The nominated member of the catching team signs in each member of the team on arrival – recording date, time of arrival, name of each member and a reference code of the catching team, company and Red Tractor Assurance number
- Each member of the catching team also certifies that they are not suffering from any enteric illnesses

TC.BC.b

Standards

Catching teams must maintain records of all farms visited within the past 6 months

- Records detailing farm addresses, members of catching team who attended/ reference code of the catching team, vehicles and catching equipment used

TC.BC.c

Standards

Immediately after signing in catching teams must make themselves aware of the defined biosecure areas on the farm

How you will be measured

- **Visual inspection made and documented**
-

- Record held of the cleanliness of catching equipment on arrival
-

KC.BC.m

Standards

Catching equipment, including catchers' transport and mechanical harvesting equipment, must be cleaned and disinfected prior to leaving the farm.

How you will be measured

- **Cleaning & disinfection on site must be documented**
- **Catching equipment can be taken to an off-site location to be cleaned and disinfected, but only if it moves directly from the farm to the off-site location. This must also be documented**

- Record held of when and where cleaning & disinfection took place

KC.BC.n

Standards

Smoking, eating and drinking must be carried out only in designated areas

How you will be measured

- **hands are washed or sanitised directly before and after smoking, eating or drinking**

KC.BC.o

Standards

Staff must not keep or have contact with other poultry or any avian species

KC.BC.p

Standards

If there are any concerns about the biosecurity provisions or facilities provided by the farm they must be raised with the nominated person of the catching team who must raise them with the farm manager/ company

- Record of any issues raised with farm manager

AIM: CATCHERS DEPOPULATION (CC)

CC.CD.a

Standards

Houses must be entered with minimum disturbance to birds by people and equipment

How you will be measured

- including if using mechanical harvesters

CC.CD.b

Standards

Light levels during catching must be maintained at a level that allows catchers to work safely but also to ensure that birds remain calm

How you will be measured

- If catching curtains are used they are power washed and disinfected prior to use on each farm
- For ducks there is no need to reduce the lighting level

CC.CD.c

Standards

Breeder replacements are caught under lighting conditions that are maintained at a level that allows catchers to work safely but also ensures birds remain calm

CC.CD.d

Standards

Carrying distances must be kept to a minimum

CC.CD.e Key

Standards

Birds must be carried appropriately for their species and size

How you will be measured

- Chickens are not carried by their wings or neck
- Turkeys:
 - are never lifted or carried by one leg
 - below 5kg they are carried by both legs or in both hands (rugby ball style)
 - above 5kg they are carried by both legs or one leg and the diagonally opposite wing
- Ducks:
 - are lifted out of the catch pen by their necks and placed directly into a module or basket

CC.CD.f Key

Standards

Birds must be placed into crates with care ensuring that none are on their backs

How you will be measured

- The nominated member of the catching team must check to ensure no birds are on their backs

CC.CD.g Key

Standards

Staff must ensure that no part of the bird has become trapped by the crate or module

How you will be measured

- The nominated member of the catching team is responsible for ensuring trappages do not occur
- The driver is responsible to check for bird trappages

CC.CD.h Key

Standards

Injured or sick birds must not be placed into crates or transported

How you will be measured

- Injured or sick birds are humanely culled by a trained person immediately
- Any culls and reasons for those culls are highlighted to the farm owner/ manager before leaving the farm

- Mortality records

CC.CD.i Key

Standards

Maximum crate stocking densities must meet legislative requirements

How you will be measured

- Stocking densities are as follows:
 - poultry weighing less than 1.6kg – 180 to 200cm²/kg
 - poultry weighing 1.6kg and over but less than 3kg – 160cm²/kg
 - poultry weighing 3kg and over but less than 5kg – 115cm²/kg
 - poultry weighing 5kg and over – 105cm²/kg
- Stocking densities also take into account the physical condition of the birds, weather conditions and journey times
- A loading matrix is to be used in high and low temperature conditions

CC.CD.j

Standards

Transport modules must be loaded according to manufacturers recommendations

CC.CD.k

Standards

Modules/crates must be placed as close as possible to the group being caught

How you will be measured

- Care taken not to crush or damage birds when placing modules/ crates

CC.CD.l

Standards

Staff must clear a space in a calm and controlled manner before any machinery enters the house

CC.CD.m

Standards

All equipment used in the catching operation, including mechanical harvesters, must be constructed and maintained in order that they are safe for use

How you will be measured

- no sharp edges, projections or other hazards

AIM: CATCHERS DEPOPULATION (TC)

TC.CD.a

Standards

Houses must be entered with minimum disturbance to birds by people and equipment

How you will be measured

- including if using mechanical harvesters

TC.CD.b

Standards

Light levels during catching must be maintained at a level that allows catchers to work safely but also to ensure that birds remain calm

How you will be measured

- If catching curtains are used they are power washed and disinfected prior to use on each farm
- For ducks there is no need to reduce the lighting level

TC.CD.c

Standards

Breeder replacements are caught under lighting conditions that are maintained at a level that allows catchers to work safely but also ensures birds remain calm

TC.CD.d

Standards

Carrying distances must be kept to a minimum

TC.CD.d.1

Standards

Turkeys and ducks must be walked to the catch pen in a calm and controlled manner

TC.CD.d.2

Standards

Catch pens must not become overcrowded

TC.CD.e Key

Standards

Birds must be carried appropriately for their species and size

How you will be measured

- Chickens are not carried by their wings or neck
- Turkeys:
 - are never lifted or carried by one leg
 - below 5kg they are carried by both legs or in both hands (rugby ball style)
 - above 5kg they are carried by both legs or one leg and the diagonally opposite wing
- Ducks:
 - are lifted out of the catch pen by their necks and placed directly into a module or basket

TC.CD.f Key

Standards

Birds must be placed into crates with care ensuring that none are on their backs

How you will be measured

- **The nominated member of the catching team must check to ensure no birds are on their backs**

TC.CD.g Key

Standards

Staff must ensure that no part of the bird has become trapped by the crate or module

How you will be measured

- **The nominated member of the catching team is responsible for ensuring trappages do not occur**
- **The driver is responsible to check for bird trappages**

-

AIM: CATCHERS DEPOPULATION (KC)

KC.CD.a

Standards

Houses must be entered with minimum disturbance to birds by people and equipment

How you will be measured

- including if using mechanical harvesters

KC.CD.b

Standards

Light levels during catching must be maintained at a level that allows catchers to work safely but also to ensure that birds remain calm

How you will be measured

- If catching curtains are used they are power washed and disinfected prior to use on each farm
- For ducks there is no need to reduce the lighting level

KC.CD.c

Standards

Breeder replacements are caught under lighting conditions that are maintained at a level that allows catchers to work safely but also ensures birds remain calm

KC.CD.d

Standards

Carrying distances must be kept to a minimum

How you will be measured

- No more than two ducks per hand with their weight being supported by a hand under their body or with two hands holding either side of the body with wings closed
- Ducks are not carried with their heads hanging downwards or by their legs alone

KC.CD.d.1

Standards

Turkeys and ducks must be walked to the catch pen in a calm and controlled manner

KC.CD.d.2

Standards

Catch pens must not become overcrowded

KC.CD.e Key

Standards

Birds must be carried appropriately for their species and size

How you will be measured

- Chickens are not carried by their wings or neck
- Turkeys:
 - are never lifted or carried by one leg
 - below 5kg they are carried by both legs or in both hands (rugby ball style)
 - above 5kg they are carried by both legs or one leg and the diagonally opposite wing
- Ducks:
 - are lifted out of the catch pen by their necks and placed directly into a module or basket

KC.CD.f Key

Standards

Birds must be placed into crates with care ensuring that none are on their backs

How you will be measured

- **The nominated member of the catching team must check to ensure no birds are on their backs**

KC.CD.g Key

Standards

Staff must ensure that no part of the bird has become trapped by the crate or module

How you will be measured

- **The nominated member of the catching team is responsible for ensuring trappages do not occur**
- **The driver is responsible to check for bird trappages**

KC.CD.h Key

Standards

Injured or sick birds must not be placed into crates or transported

How you will be measured

- **Injured or sick birds are humanely culled by a trained person immediately**
- **Any culls and reasons for those culls are highlighted to the farm owner/ manager before leaving the farm**

- Mortality records

KC.CD.i Key

Standards

Maximum crate stocking densities must meet legislative requirements

How you will be measured

- **Stocking densities are as follows:**
 - poultry weighing less than 1.6kg – 180 to 200cm²/kg
 - poultry weighing 1.6kg and over but less than 3kg – 160cm²/kg
 - poultry weighing 3kg and over but less than 5kg – 115cm²/kg
 - poultry weighing 5kg and over – 105cm²/kg
- **Stocking densities also take into account the physical condition of the birds, weather conditions and journey times**
- **A loading matrix is to be used in high and low temperature conditions**

KC.CD.j

Standards

Transport modules must be loaded according to manufacturers recommendations

KC.CD.k

Standards

Modules/crates must be placed as close as possible to the group being caught

How you will be measured

- **Care taken not to crush or damage birds when placing modules/ crates**

KC.CD.1

Standards

Staff must clear a space in a calm and controlled manner before any machinery enters the house

KC.CD.m

Standards

All equipment used in the catching operation, including mechanical harvesters, must be constructed and maintained in order that they are safe for use

How you will be measured

- **no sharp edges, projections or other hazards**
-

AIM: MECHANICAL HARVESTING (CC)

CC.MH.a Key

Standards

If mechanical harvesting, the machine operator must be able to provide evidence that he has undertaken training for the machine that he is operating and has knowledge of action to be taken in the event of machine failure

CC.MH.b

Standards

If mechanical harvesting, birds must be cleared in such a way that they are collected as the machine moves forward and they are not allowed to move behind the vehicle

CC.MH.c

Standards

Speed of mechanical harvesting equipment must be set low enough not to cause damage to birds

CC.MH.d

Standards

Any damage to birds during mechanical harvesting must be monitored and issues rectified

AIM: MECHANICAL HARVESTING (TC)

TC.MH.a Key

Standards

If mechanical harvesting, the machine operator must be able to provide evidence that he has undertaken training for the machine that he is operating and has knowledge of action to be taken in the event of machine failure

TC.MH.b

Standards

If mechanical harvesting, birds must be cleared in such a way that they are collected as the machine moves forward and they are not allowed to move behind the vehicle

TC.MH.c

Standards

Speed of mechanical harvesting equipment must be set low enough not to cause damage to birds

TC.MH.d

Standards

Any damage to birds during mechanical harvesting must be monitored and issues rectified

AIM: MECHANICAL HARVESTING (KC)

KC.MH.a Key

Standards

If mechanical harvesting, the machine operator must be able to provide evidence that he has undertaken training for the machine that he is operating and has knowledge of action to be taken in the event of machine failure

KC.MH.b

Standards

If mechanical harvesting, birds must be cleared in such a way that they are collected as the machine moves forward and they are not allowed to move behind the vehicle

KC.MH.c

Standards

Speed of mechanical harvesting equipment must be set low enough not to cause damage to birds

KC.MH.d

Standards

Any damage to birds during mechanical harvesting must be monitored and issues rectified

AIM: BIOSECURITY FOR TRANSPORT (CC)

CC.BT.a

Standards

Drivers must sign-in immediately on arrival at the farm

How you will be measured

- Signatures in the visitor book must be legible

CC.BT.b

Standards

Immediately after signing in the driver must make themselves aware of the defined biosecure areas on the farm

How you will be measured

- only after this has been done does the driver enter the biosecure area

CC.BT.c Key

Standards

Dedicated clothing and footwear must be worn by all on entry to each bird area at partial depopulation

How you will be measured

- disposable clothing or clothing which is washed between farms is worn
- dedicated boots must be worn and cleansed and disinfected between bird houses using a Defra-approved disinfectant

CC.BT.d Key

Standards

Dedicated clothing and footwear must be worn by all on entry to the biosecure area at full depopulation

How you will be measured

- disposable clothing or clothing which is washed between farms is worn
- boots are able to be cleaned and disinfected (i.e. are rubber) and are thoroughly washed, scrubbed and disinfected using a Defra-approved disinfectant between farms

CC.BT.e Key

Standards

Footdips must be used on entry to the biosecure area

How you will be measured

- Footdips are used on each entry to the biosecure area

CC.BT.f Key

Standards

Hands must be washed or sanitised on entry to the biosecure area

How you will be measured

- hands are washed/ sanitised on each entry to the biosecure area

CC.BT.g Key

Standards

Only essential vehicles must enter the biosecure area e.g. poultry transport lorry, vehicles containing essential equipment

How you will be measured

- **personal transport is not considered as an essential vehicle and remains parked outside the biosecure area**
- **for breaks drivers use the facilities provided by the farm or a clean company vehicle which has been disinfected on entry to the biosecure area**

CC.BT.h Key

Standards

Footdips must be used on entry and exit to each poultry house

CC.BT.i Key

Standards

Footwear must be visibly clean before using a new footdip when moving to a new house

CC.BT.j Key

Standards

All vehicles, including wheels, and equipment must be cleansed and disinfected on entering the farm

How you will be measured

- **Effective pressure wash facilities and drains**

CC.BT.k

Standards

Vehicles, forklifts, transport crates and modules must arrive on-farm clean and disinfected

How you will be measured

- **Visual inspection made and documented**

- **Record held of the cleanliness of transport equipment on arrival**

CC.BT.l

Standards

The loading area provided must be used for loading birds

CC.BT.m

Standards

Forklifts and other equipment used by the driver must be cleaned and disinfected prior to leaving the farm

How you will be measured

- **Equipment can be taken to an off-site location to be cleaned and disinfected, but only if it moves directly from the farm to the off-site location.**

CC.BT.n

Standards

Smoking, eating and drinking must be carried out only in designated areas

How you will be measured

- hands are washed or sanitised directly before and after smoking, eating or drinking
-

CC.BT.o

Standards

Drivers must not keep poultry or any avian species

CC.BT.p

Standards

If there are any concerns about the biosecurity provisions or facilities provided by the farm they must be raised with the farm manager/ company

- Record of any issues raised with farm manager
-

AIM: BIOSECURITY FOR TRANSPORT (TC)

TC.BT.a

Standards

Drivers must sign-in immediately on arrival at the farm

How you will be measured

- Signatures in the visitor book must be legible

TC.BT.b

Standards

Immediately after signing in the driver must make themselves aware of the defined biosecure areas on the farm

How you will be measured

- only after this has been done does the driver enter the biosecure area

TC.BT.c Key

Standards

Dedicated clothing and footwear must be worn by all on entry to each bird area at partial depopulation

How you will be measured

AIM: POULTRY TRANSPORT (CC)

CC.CT.a

Standards

All birds must be transported by transporters registered with the Red Tractor Poultry Scheme

CC.CT.b

Standards

Each vehicle must carry a written statement of maximum stocking density

How you will be measured

- The statement details the maximum number of birds by weight band to be transported

CC.CT.c Key

Standards

The driver must be competent and trained in the handling and welfare of poultry

CC.CT.d

Standards

All vehicles have a written Emergency Action Plan

How you will be measured

- Plan details what procedures should be followed in the case of fire, accident or traffic congestion, contact numbers for breakdown services and processing plants

- Emergency Action Plan

CC.CT.e

Standards

Drivers have the means of mobile communication with the farm and/or processing plant

CC.CT.f

Standards

The time between start of loading and end of unloading at the processing plant must not exceed twelve hours

How you will be measured

- Time calculated from when first bird is loaded into crate to when last bird is unloaded at the processing plant (per vehicle)

CC.CT.g

Standards

Journeys must be planned in advance to minimise waiting times

How you will be measured

- Driver ensures the welfare of birds is not compromised by insufficient co-ordination of different parts of the journey and the weather conditions are taken into account

CC.CT.h

Standards

Birds must be transported in modular systems which must be placed as close as possible to the group being caught

How you will be measured

- Care taken not to crush or damage birds when placing modules/ crates

CC.CT.i

Standards

Urine & faeces must not fall directly onto birds below when modules are stacked on top of each other on a vehicle

How you will be measured

- Module tops are solid

CC.CT.j

Standards

Action must be taken to prevent heat or cold stress from occurring

How you will be measured

- Standard applies to vehicles in motion and stationary vehicles
- Protection is available for use in the winter months
- Measures are in place to protect the birds from heat stress in periods of high temperature and humidity
- The adoption of power-ventilated vehicles or a reduction in crate/ module stocking density has been considered
- Contingency measures are in place to provide emergency natural ventilation if required

CC.CT.k

Standards

Vehicles must be maintained so not to pose a risk of injury to birds

How you will be measured

- Vehicles:
 - prevent birds escaping or falling out
 - withstand stresses of movement
 - ensure air quality can be maintained
 - provide access to birds to allow them to be inspected
 - provide lighting e.g. a torch held on the vehicle, sufficient for inspection of birds

CC.CT.l

Standards

Transport crates must be maintained in good condition so not to pose a risk of injury to birds

How you will be measured

- Any sharp edges or protrusions with which animals may come into contact must be removed entirely

CC.CT.m

Standards

The haulier must retain records for traceability purposes and these must be kept for two years

How you will be measured

- **Records include:**
 - **date of movement**
 - **farm of origin and its scheme registration number**
 - **destination**
 - **number of birds transported**
 - **mortalities**
 - **start of loading and end of loading time**
 - **start of journey and end of journey time**
 - **vehicle identification**
 - **register of complaints and any action taken**
-

- Haulage records
-
