

	CODE		Do you meet the requirements of the Standards?		
CODE	STANDARD				
LI.a	The site must be licensed by the relevant authority for the animal gatherings undertaken on-site				
LI.b	Gathering licence conditions must always be complied with				
LI.b.1	A documented licence implementation plan is available to staff and followed				
Ll.c	Where sites are used for pig gatherings, specific conditions must be adhered to				
	DOCUMENTS AND PROCEDURES	YES	NO	N/A	
DP.a	Sites must hold a copy of the Red Tractor Assurance – Market/Collection Centre standards				
DP.b	A plan for the effective management of serious incidents and potential emergency situations must be documented, kept up-to-date and implemented when necessary				
DP.b.1	A disease outbreak contingency plan must be documented, kept u-to-date, and implemented when necessary				
DP.b.2	Key plans are developed with input from key personnel				
DP.b.3	Staff have access to and an understanding of the plans relevant to them				
DP.b.4	The contact details of key personnel are displayed appropriately to enable the reporting of issues and emergencies				
DP.c	Systems must be in place for the recording, investigating and resolution of any complaints received that are relevant to the requirements of the Standards				
	STAFF AND LABOUR PROVIDERS	YES	NO	N/A	
SC.a	Systems must be in place to ensure that all staff are effectively trained and deemed competent to carry out the activities that they are employed to do				
SC.a.1	Temporary staff, used at seasonal sales are experienced, competent, and inducted to their task				
SC.b	The performance and competence of staff must be regularly reviewed, and refresher training implemented as required				
SC.c	Records of staff training, and performance reviews must be kept				
SC.d	There must be enough competent staff on-site to care for and handle livestock				
	TRACEABILITY, ASSURANCE STATUS AND TRADING STATUS	YES	NO	N/A	
TA.a	The site must have a fully operational and demonstrably effective traceability system, from supplier through to customer				

TI.a.1	The system must include a complete record of movements of livestock, on to and off the site			
TA.a.2	Traceability documentation for all livestock is received and reviewed to ensure it is			
	complete			
TA.a.3	Livestock movements must be registered to national databases within the required			
	timeframe			
TA.a.4	Traceability documentation is provided to the next link in the chain			
TA.b	Incoming livestock must be identified, in accordance with legislation, when they arrive on-site			
TA.b.1	Errors in livestock identification or movement documentation are investigated and			
.,	acted upon			
TA.c	A system must be in place that enables vendors to declare key information, relevant			
	to assurance, health, and welfare			
TA.c.1	Relevant information must be notified to potential buyers			
TA.d	Where livestock is claimed to be assured, systems must be in place to verify the			
	assurance requirements behind the claim			
TA.e	Systems must be in place to ensure assured livestock are identifiable from non-			
	assured livestock			
TA.f	All persons involved in delivering the traceability requirements must be			
	demonstrably competent			
	BIOSECURITY AND DISEASE CONTROL	YES	NO	N/A
BD.A	A Biosecurity Officer with overall responsibility for site biosecurity, must be			
	appointed			
BD.a.1	The Biosecurity Officer must be trained and demonstrably competent			
BD.b	A biosecurity plan must be documented and implemented			
BD.c	Biosecurity risks posed by staff must be identified and minimised			
BD.c.1	Staff wear clean boots and outer clothing at the start of each gathering			
BD.d				
	Facilities to cleanse and disinfect boots and wash hands must be made available to all site users			
BD.d.1 BD.e	all site users			
BD.d.1	all site users Boot cleaning facilities must be maintained and provide effective disinfection			
BD.d.1 BD.e	all site users Boot cleaning facilities must be maintained and provide effective disinfection Public access to the livestock and loading areas must be restricted Systems must be in place to prevent contact between the livestock on-site and

BD.j	Animal derived wastes must be stored appropriately pending disposal			
BD.j.1	Animal derived wastes must be disposed of appropriately			
BD.j.2	Fallen stock must be stored appropriately pending prompt disposal via an approved method			
BD.j.3	All other wastes must be disposed of in a manner that minimises the risk of			
	contamination or pollution			
	SITE CLEANLINESS	YES	NO	N/A
CL.a	The site must be regularly cleansed and disinfected			
CL.a.1	Records of cleansing and disinfection must be kept			
CL.a.2	All persons who undertake site cleansing and disinfection must be demonstrably competent			
CL.b	Dedicated, functioning washing equipment is available and used to cleanse and disinfect the site			
CL.c	A supply of water must be available for use			
	SITE MANAGEMENT AND CONSTRUCTION	YES	NO	N/A
MC.a	The site is well managed and of a clean and tidy appearance			
MC.b	Effective system must be in place to control vermin on-site			
MC.c	Systems must be in place to ensure that those delivering livestock have an awareness of arrival and unloading procedures			
MC.d	All facilities livestock have access to are suitably designed, maintained, and constructed to provide a suitable environment for livestock			
MC.e	Suitably designed and constructed loading facilities must be provided			
MC.f	Floors which livestock have access to must be suitably designed, constructed, and maintained to minimise the risk of slipping, falling or injury and allow effective cleansing			
MC.g	Livestock areas have sufficient lighting to allow normal behaviours, effective handling, and inspection			
MC.h	Livestock must be kept in conditions that provide appropriate thermal conditions			
MC.i	Facilities must be available for the segregation of sick or injured livestock			
MC.j	Handling and inspection facilities must always be available for use			
MC.k	A system must be in place to ensure maintenance issues are identified and rectified			
	ANIMAL HEALTH AND WELFARE	YES	NO	N/A
AW.a	A system must be in place to check the health and welfare of all livestock that come onto site			
AW.a.1	A system must be in place to check the health and welfare of all livestock regularly whilst the livestock are on-site			
AW.b	Prompt appropriate action must be undertaken in the event of an animal arriving unfit or becoming unfit to travel whilst on-site			

AW.b.1 AW.b.2 Livestock that require emergency killing must be dealt with immediately by a competent person according to the site's documented procedure AW.c. Dairy cows with overstocked udders must be milked prior to onward consignment AW.c.1 Milking equipment must be maintained and tested AW.d. Livestock must be held on-site for the minimum time possible AW.e. Livestock must be handled appropriately for their species behaviour AW.e.1 Handling aids used on-site must be suitable for the species and used appropriately AW.f. Livestock must be grouped appropriately to avoid bullying, injury, or distress AW.f. Fractious livestock must be penned and handled appropriately to minimise distress and the risk of injury AW.g. Systems must be in place to ensure livestock are penned with sufficient space allowances to ensure animals are not overcrowded AW.g.1 Livestock space allowances are increased as needed to safeguard welfare AW.h. Additional provisions are given to specific categories of livestock to deliver their welfare needs AW.j. Facilities for providing fresh, clean drinking water to livestock must be available and provided as necessary to meet welfare needs AW.j. Where feed is provided, it must be provided in a way that enables all livestock to take sufficient feed AW.j.2 Feed purchase records must be kept AW.k. An Animal Welfare Officer (AWO) with overall animal welfare responsibility, must be appointed AW.k.1 The AWO must be appropriately trained and demonstrably competent AW.J. All staff involved in the care, handling and management of livestock on-site must be demonstrably competent AW.J. Welfare incidents must be investigated, and appropriate corrective action implemented AW.m. The AWO must maintain a record of all welfare incidents that occur on-site AW.m. AW.m. AW.M. A record of the investigation, findings and any corrective action undertaken must be recorded and reviewed annually				
AW.c. Dairy cows with overstocked udders must be milked prior to onward consignment AW.c.1 Milking equipment must be maintained and tested AW.d. Livestock must be held on-site for the minimum time possible AW.e. Livestock must be held on-site for the minimum time possible AW.e.1 Handling aids used on-site must be suitable for the species behaviour AW.e.1 Handling aids used on-site must be suitable for the species and used appropriately AW.f. Livestock must be grouped appropriately to avoid bullying, injury, or distress AW.f.1 Fractious livestock must be penned and handled appropriately to minimise distress and the risk of injury AW.g. Systems must be in place to ensure livestock are penned with sufficient space allowances to ensure animals are not overcrowded AW.g.1 Livestock space allowances are increased as needed to safeguard welfare AW.h Additional provisions are given to specific categories of livestock to deliver their welfare needs AW.i Facilities for providing fresh, clean drinking water to livestock must be available and provided as necessary to meet welfare needs AW.j Suitable feed must be available and provided as necessary to meet welfare needs AW.j.1 Where feed is provided, it must be provided in a way that enables all livestock to take sufficient feed AW.j.2 Feed purchase records must be kept AW.k An Animal Welfare Officer (AWO) with overall animal welfare responsibility, must be appointed AW.k.1 The AWO must be appropriately trained and demonstrably competent AW.k.3 Deputies appointed to assist the AWO on sites with high throughputs/frequent gatherings must be appropriately trained and demonstrably competent AW.k.1 Staff involved in the care, handling and management of livestock on-site must be demonstrably competent AW.I.1 Staff involved in the care, handling and management of livestock are given regular training updates AW.m The AWO must maintain a record of all welfare incidents that occur on-site AW.m.2 Arecord of the investigation, findings and any corrective action unde	AW.b.1	9
